

# Returns & Refunds Policy Audit - 2026

Canyon Trail Outfitters - internal audit of returns handling

Audit date: 2026-06-24 Auditor: internal audit (retail ops)

Scope: refund authorization limits, serial-return detection, denied-return correspondence, restocking and salvage disposition.

## Findings:

1. Refunds above \$500 require manager override - control operating.
2. Serial-return detection is manual; recommend automated flag when a loyalty account exceeds 3 returns / 90 days (see case 95001).
3. One denied return (SO-30000010) lacked the dispute-rights insert in the first letter sent; corrected letter issued 2026-06-22.
4. Discount overrides above the 40% policy ceiling found on 1 order line (SO-30000005); VP exception was not on file.

Overall: SATISFACTORY WITH EXCEPTIONS. Follow-up due 2026-09-30.

All Canyon Trail Outfitters data is fictional and generated for training.
