

HIPAA Security Risk Analysis - 2026

Lakeshore Health Partners - annual security risk analysis

Assessment date: 2026-05-28 Assessor: Northland Privacy Advisors LLC

Scope: EHR, clinic network, portal, interfaces, workforce practices.

Findings:

1. HIGH: patient Social Security numbers found in free-text clinical notes (encounters.note_txt, 2 confirmed instances). Identifiers must not be documented in notes. Remediation: redact, retrain, add DLP scanning of note fields.
2. MEDIUM: two shared front-desk logins at St. Cloud Riverside; individual accounts issued 2026-06-05.
3. LOW: portal session timeout above policy (30 min vs 15). Fixed.
4. Encryption at rest and in transit verified across all six clinics.

Overall: CORRECTIVE ACTION REQUIRED on finding 1. Re-test 2026-09-30.

All Lakeshore Health Partners data is fictional and generated for training.
